 September 2006

### Source:

The information used for this map was collected from part of a larger survey created by the Ohio Township Association, which was mailed to all Ohio townships. Missing data were collected through county extension offices, county planning offices, and other sources. Though we believe this information is correct, we have no way of knowing for sure the complete accuracy of this data, and we encourage people to contact a township's clerk if needed for verification purposes.

### Acknowledgments:

We acknowledge the work of Don Lacy, who has worked several years to make sure that this map was made as accurately as possible; the Ohio Township Association, who created the survey that was the basis for the data used for this map, and who helped to provide information when needed; Jill Clark, who provided us with the map layers needed to produce this map; and Tim Pritchard and John Stamm, whose 1998 map of township zoning was used as the basis for this one.
