December 4<sup>rd</sup>, 2020

Bob Warnimont  
Walt Celley, Administrator  
Perrysburg Township  
26609 Lime City Road  
Perrysburg, OH 43551

Good Day Mr. Celley and Mr. Warnimont!

It is that time of year again when Rambling River Girl Scouts are preparing for our cookie season! We would again like to request the use of the Lime City Road location for our cookie delivery. The cookie timeline has changed again this year and the cookie season has been reduced. Our tentative delivery date will be Friday, February 5th with distribution on the 6th. I will be your Cookie Chairperson again this year with Vicki Blanco assisting. I have now 5 years of experience with delivery and I am confident that our delivery will be a smooth, efficient process.

As you may know, the Rambling River Girl Scout service unit serves over 500 girls and their families in the Perrysburg, Perrysburg Township and Rossford communities. Through Girl Scouting, girls become leaders in their daily lives and prepare for their bright futures! The Girl Scout Cookie Sale provides an important ingredient for leadership by helping girls develop five key skills: Goal setting, Decision making, Money management, People skills and Business ethics. The use of the facility on Lime City Road for our annual cookie delivery is greatly appreciated. The indoor delivery space and help are invaluable to our girls and has helped to ensure a convenient, dry and successful cookie delivery in our community for many years.

We are hopeful that we can continue to use the Lime City Road facility and look forward to your decision. We appreciate our continued partnership with Perrysburg Township and the opportunity for our Girl Scouts to help serve the township as well. Please contact me if you have a project where the girls can help. We have troops that can help with flag ceremonies, park cleanup and many other projects.

Thank you again.

Sincerely,

Wendy Lewis  
Service Unit Cookie Chair

State Representative | Ohio House District 3

December 12, 2020

The Honorable Robert P. Mack  
Perrysburg Township Trustee  
26609 Lime City Road  
Perrysburg, OH 43551

Dear Trustee Mack:

Thank you for your letter dated November 23, 2020, regarding concerns with noise created by traffic on the Ohio Turnpike in Wood County.

I contacted Ferzan M. Ahmed, P.E., Executive Director of the Ohio Turnpike and Infrastructure Commission, regarding procedures for acquisition and installation of noise mitigation barriers. As you are aware, the Ohio Turnpike and Infrastructure Commission is a separate and independent entity; however, the Ohio Legislature does work closely with and offer recommendations to the Commission to address the needs of the motoring public and communities impacted by the Turnpike.

It is important to note that the Ohio Turnpike is operated solely on toll and concession revenue. The Ohio Turnpike is not classified as a "Federal Aid Highway" and, therefore, is not eligible to receive any form of Federal Highway funds requiring noise compliance. In accordance with the Commission's Master Trust Agreement with its bondholders, there is a hierarchy of how toll and Concession revenue must be utilized; (1) operations, (2) debt service, and (3) capital expenses for maintenance and improvement of the road and facilities.

Presently, the Commission does not construct or fund noise mitigation on Ohio Turnpike right of ways (ROW). However, in a previous state transportation budget bill the Ohio Legislature created the Turnpike Mitigation Program (TMP) to minimize the impact to communities that are adversely affected by the presence of the Ohio Turnpike. The TMP was administered and funded by the Ohio Department of Transportation (ODOT). Project types that were eligible for consideration include bridge preservation, minor resurfacing, noise barriers, drainage improvements or other improvements required for public transportation.

During this program, ODOT selected and constructed several noise mitigation projects on the Ohio Turnpike ROW. These projects were funded by ODOT and contributions from local governments. Currently, no additional funds have been made available for the TMP and no applications are currently being accepted by ODOT.

In discussing this issue with Executive Director Ahmed, besides the availability of funds, he cited other considerations when evaluating the feasibility and merit of constructing noise mitigation structures. Primarily, like any public project there is a cost vs. benefit analysis that must be considered; the cost of the project must be weighed against the level of potential mitigation and the number of benefitted receptors. With the specific area in question, a major factor affecting the cost of installing a noise mitigation structure would be the buildability of the area given the topography involved. It is also worthwhile to consider when the property was developed and what significant changes have been made to the Turnpike since the development of the

property. Therefore, even if funding were to become available, a comprehensive study would still need to be completed prior to committing to any project.

I will continue to monitor the situation, and will advocate for solutions to mitigate the noise created through the stretch of Ohio Turnpike mentioned in your correspondence.

Sincerely,

Haraz N. Ghanbari  
Member of the Ohio House of Representatives
